

Our price policy

Dear customer

We are always developing and producing high-quality tool solutions, which are located in the premium segment. In addition to the highest quality requirements of our products, we attach great importance to consulting on offering every customer the best possible solution.

In other words, you as a customer can rely on the fact that you can use the purchased tool to achieve the results that you expect. We are also here for you and support you quickly and unbureaucratic if you should have any problem during your production. Because we are well aware of the fact that standing production machines cost money properly and this must be avoided under all circumstances.

The diverse customer requirements are a constant incentive for us to redefine or further develop our services and products. We are constantly and sustainably investing in product innovation in the area of flexible deburring and marking in order to continue to offer our customers decisive added value in the future.

Our prices are calculated in such a way that we can guarantee the above described information to all our customers and at all times. In order to be able to fulfil this promise, all customers are treated equally and we work with a clear pricing policy. Any small quantity discounts will only be granted from a purchase quantity of at least 5 units.
